Restaurant Recommended System

Originally created by Dave Gray at

## Restaurant Recommended System

Enhancing the advantages of creating an advanced and tailored recommendation system that assists users in discovering dining choices that align with their tastes, while also extending beyond their immediate social networks.

What can we imagine them doing?

What do they need to do differently? What job(s) do they want or need to get done? What decision(s) do they need to make? How will we know they were successful?

> Install the Al system project build by us

Users might seek out special promotions, discounts and other offers.

Location of restraunt

Giving their preferences

Type of food restaurant

Menu without food photos

some of the restaurants not having Basic facility

## What do they SEE?

What do they see in the marketplace? What do they see in their immediate environment? What do they see others saying and doing? What are they watching and reading?

Is the restaurant budget friendly?

## What do they SAY?

What have we heard them say? What can we magine them saying?

Ineed recommendations for different cuisines and price ranges.

I don't want to spend too much time searching; it should be easy and quick.

Recommendations options and with friends as well as social media.

the platform.

parking facility I could not locate. Staff can be little more local speaking
